

# ALEX PALMA

## SOFTWARE ENGINEER

### MY PROFILE

I'm Alex Palma, a 19-year-old Ecuadorian web developer and designer. I'm passionate about creating intuitive user interfaces and memorable digital experiences. I've worked as a freelancer and for companies, which has given me a solid foundation in practical development. I'm currently in my third semester of Software Engineering at the Universidad Politécnica Salesiana, where I continue to hone my skills in turning complex ideas into elegant and functional code.

### WORK EXPERIENCE

#### WebStart Inc.

January 2023 - July 2023

My first foray into the professional world. I learned the basics of modern HTML, CSS, and JavaScript, helping maintain static websites, and applying my theoretical knowledge to real-world projects.

#### PixelPerfect Studios

July 2023 - december 2023

I made the leap to React, where I contributed to the development of interactive user interfaces for clients. I worked closely with designers to implement pixel-perfect UI components and consumed REST APIs to integrate dynamic data.

#### CreativeCode Labs

January 2024 - july 2025

I specialized in creating design systems using Tailwind CSS and ShadCN UI. My focus was on building a library of reusable and accessible components, improving consistency and accelerating development across the company.

### ACADEMIC TRAINING

#### Universidad politécnica salesiana del Ecuador

2024 - 2028
